

NISEKO HIGASHIYAMA ONSEN GUIDE FOR HILTON NISEKO VILLAGE

Welcome to one of Japan's best hot springs in "Niseko Onsen Village"

It is true that tourism in the Niseko region began as a hot spring resort. The natural waters of Niseko Onsen village have three important qualities that are known for the benefit of skin care. When the combination of Hydrogen Carbonate, Sulfate and Sulfur are found together they are indication of the highest quality spring water. In 1958 the Ministry of the Environment certified the Niseko Onsen Village area as a natural hot spring resort. The area has continued to be a popular destination for hot spring enthusiasts.

About the continuous flow of pure hot spring water at "Niseko Higashiyama Onsen"

"Niseko Higashiyama Onsen" is part of the historical Niseko Onsen Village. We have a large indoor bath and a wide outdoor bath next to a pond with stunning views of Mt. Yotei (1,898m). You can enjoy the view of "Ezo Fuji" from both the indoor and outdoor baths. Our hot spring water is known for long lasting warmth effect on the body after bathing. The temperature of the source is 72.1 °C, the rare hot water and the continuous flow rate of 419 liters per minute are indications of the pure natural resources which surround the Niseko area. You may notice "flowers of sulphur" in the water which are further proof of the quality of the natural hot spring. Please relax and take your time to enjoy the wonderful nature and beautiful scenery that changes with each season in Niseko.

Hot Spring Qualities: Sodium - Chloride / Recommended for: nerves, muscle pain, joint pain, stiff shoulders, fatigue and poor circulation
